#### For the Nine months ended March 31, 2017

The directors of your company are presenting their report to the shareholders together with the reviewed financial information for the nine months ended March 31, 2017.

#### General Economic Overview:

The economy is on sustainable growth path with most of the indicators showing the positive trend. The GDP is expected to grow at the rate of 5.2% for the fiscal year 2016-17, compared to 4.7% of last year. The improved outlook is derived from the cumulative impact of government's economic and structural reform programs, sustained lower oil prices and the gradually improving law and order situation. The foreign exchange reserves stood at highest level of USD 23.3 billion. The strong reserve position averted a significant depreciation in the Rupee, which remained relatively firm despite weakening of regional currencies. Inflation remained under control at 3.9% due to stagnant oil prices and steady exchange rate. Acknowledging the improving macros, the SBP has maintained a status quo on the policy rate since May-16 and maintained it at 40 years' low level. The improved economic indicators together with PSX's divestment to a Chinese consortium, kept the momentum going in the capital markets. Resultantly, the PSX 100 index reached an all-time high of 47,807 points.

#### Real Estate and construction sector overview:

The real estate sector in Pakistan is growing and is an important sector of the economy. Pakistan spends about \$5.2 billion on construction annually, and construction output accounts for 2pc of GDP.

In FY16, loans to the construction industry more than doubled from Rs. 14 billion to Rs. 31.5 billion with a fresh lending of Rs. 17.5 billion. Add to it the Rs. 16 billion lent to the real estate sector (trading, renting and business) and the total amount (given to the two sectors) soars to Rs. 33.5 billion. The channelization of increasing funds towards real estate and construction sector hints an encouraging future for this sector. Moreover, the accelerating rate of urbanization in the country is contributing well towards growing demand of housing, thereby providing a strong support to the future prospects of real estate and construction sectors in Pakistan.

#### Company Performance and Financial Overview:

Comparison for the results of the nine months ended March 31, 2017 as against March 31, 2016 is as follows:

During the period, the sales revenue increased significantly by 48% to Rs.343.014 million, as against Rs.231.958 million during the same period last year. The primary reason for such increase is the sale of whole second floor of Pace Tower during the period, contributing around Rs.93.2 million towards sale revenue. Cost of Sale increased by 30% as compared with last year. The increase in cost of sale was due to corresponding increase in sale.

#### Settlement of financial obligations during the period:

During the period under review, the Company entered into a Debt/ Asset Swap Agreement ('DSA') with Pak Oman Investment Corporation ('POIC') for the settlement of the part of principal outstanding along-with markup accrued thereon aggregating to Rs.503.981 million against the property of the Company situated at lower ground floor and upper ground floor of Pace Towers measuring 11,487 square feet and 5,850 square feet respectively. In accordance with the DSA, POIC purchased the property of the company for a consideration of Rs.300.789 million and waived accrued markup of Rs.203.192 million.

Moreover, during the period, the Company also entered into a Debt/ Asset Swap Agreement ('DSAA') with PAIR Investment Company Limited (formerly Pak-Iran Joint Investment Company Limited) ('PICL') for the settlement of Rs96.443 million provided by PICL and mark up of Rs.9.006 million against property of the Company situated at

Mezzanine floor of Pace Towers measuring 5,700 square feet. Additionally, PICL vacated its charge previously created in Pace's MM Alam Plaza to the extent of Rs.120.85 million.

#### Company's ability to continue as a Going Concern:

The Company has not been able to meet various obligations towards its lenders, including repayment of principal and markup thereon in respect of its borrowings. The Company has also been unable to realize its existing receivables from customers and is facing difficulties in sale of its inventory, being encumbered against its borrowings. These conditions may affect the Company's ability to continue as a going concern. In order to improve its profitability and cash-flow position, Board of Directors of the Company has approved in-principle, various new Joint Ventures. The BOD has also authorized CEO to identify, negotiate and finalize more Joint Venture projects across Pakistan especially in major cities. These joint ventures would help the Company to strengthen its brand, and to reap the lucrative profits being offered by continuously growing construction and real estate sector of Pakistan.

#### Change in Board of Directors:

Syed Abid Raza has been resigned from the Board of Directors on 25 March 2017.

#### **Future Outlook:**

Through the delivery of key development projects during FY 2017 in form of Pace Towers and significant investment and share in pace Circle, we look forward to on boarding significant operating cash flows by successfully converting non-income-producing assets to cash flowing operating assets.

While we will continue to focus on improving our capital structure over the coming years, we will also look to make diligent and sound investment decisions when compelling opportunities arise.

With best-in-class assets and properties in prime irreplaceable dense cluster locations and a great team, we hope that our investors continue to focus on our fundamentals as a high-quality, innovative company in real estate sector of Pakistan with a unique built-in platform for growth.

We thank our employees, for their hard work and strong commitment to our Company.

We are grateful for the confidence our investors have placed in us in this time of need and we ensure to continue our efforts and struggle to turnaround the situation and to produce improving results for shareholders in the near future.

## NOTES TO AND FORMING PART OF THE CONDENSED INTERIM FINANCIAL INFORMATION FOR THE QUARTER AND NINE MONTHS ENDED MARCH 31, 2017 (UN-AUDITED)

#### 1. The Company and its operations

Pace (Pakistan) Limited ('the Company') is a public limited Company incorporated in Pakistan and is listed on Pakistan stock exchange. The object of the Company is to build, acquire, manage and sell condominiums, departmental stores, shopping plazas, super markets, utility stores, housing societies and to carry out commercial, industrial and other related activities in and out of Pakistan. The address of the registered office of the Company is 2<sup>nd</sup> floor Pace Mall, Fortress Stadium, Lahore.

#### 1.1 Going concern assumption

As at the reporting date, the current liabilities of the Company have exceeded its current assets by Rs 2238.154 million and The management of the Company however, is continuously engaged with its lenders for settlements of its borrowings. During the current period PAIR Investment Company Limited (formerly Pak-Iran Joint Investment Company Limited) and Pak Oman Investment Corporation have settled their outstanding amounts against property situated at Pace Towers as mentioned in note 6.1.

The Company has also approached other lenders referred to in note 6 and 7 of these financial statements for restructuring/settlements of loans. As per the proposals the Company expects the following:

- Relaxation in payment terms of principal outstanding and over due markup;
- Settlement of principal amounts against properties of the Company; and
- Waiver of overdue markup;

The management of the Company is confident that the above actions and steps shall enable the Company to realize its existing receivables, aid the sale of inventory from the completed projects referred above and utilize the resultant liquidity for completion and sale of its 'Pace Towers' Project.

The condensed interim financial information has been prepared on a going concern basis based on the management's expectations that:

- the Company will be able to obtain relaxations from its lenders as highlighted above;
- the Company will be able to settle loans against its properties; and
- the Company will be able to readily realize its receivables and inventory and be able to utilize the resultant liquidity for completion and sale of the 'Pace Towers' Project.

The condensed interim financial information consequently, does not include any adjustment relating to the realization of its assets and liquidation of liabilities that might be necessary should the Company be unable to continue as a going concern

#### 2. Statement of compliance

The condensed interim financial information is unaudited and has been prepared in accordance with the requirements of the International Accounting Standard (IAS) 34 - 'Interim Financial Reporting' and provisions of and directives issued under the Companies Ordinance, 1984. In case where requirements differ, the provisions of or directives issued under the Companies Ordinance, 1984 have been followed. This condensed interim financial information does not include all the information required for annual financial statements and therefore should be read in conjunction with the annual financial statements for the year ended June 30, 2016.

#### 3. Significant accounting policies

The accounting policies adopted for the preparation of this condensed interim financial information are the same as those applied in the preparation of preceding annual published financial statements of the Company for the year ended June 30, 2016 except for the adoption of new accounting policies as referred to in note 3.1.1.

#### 3.1 Initial application of standards, amendments or an interpretation to existing standards

Following amendment to existing standard and interpretation has been published and is mandatory for accounting periods beginning on or after January 1, 2016 and is considered to be relevant to the Company's operations:

#### Amendments to published standards effective in current period 3.1.1

- IAS 27 'Equity method in separate financial statements'. This is applicable on accounting periods beginning on or after January 01, 2016. The IASB has made amendments to IAS 27 Separate Financial Statements which will allow entities to use the equity method in their separate financial statements to measure investments in subsidiaries, joint ventures and associates. The amendments introduce the equity method as a third option. The election can be made independently for each category of investment (subsidiaries, joint ventures and associates). Entities wishing to change to the equity method must do so retrospectively. The application of this standard has no material impact on the Company's condensed interim
- 'IAS 1 'Disclosure Initiative'. This is applicable on accounting periods beginning on or after January 01, 2016. The amendments to IAS 1 Presentation of Financial Statements are made in the context of the IASB's Disclosure Initiative, which explores how financial statement disclosures can be improved. The amendments provide clarifications on a number of issues, including materiality, disaggregation and subtotals, notes and OCI arising from investments accounted for under the equity method. According to the transitional provisions, the disclosures in IAS 8 regarding the adoption of new standards/accounting policies are not required for these amendments. The application of these changes has no material
- IFRS 10, IFRS 12 and IAS 28 'Investment entities: Applying the consolidation exception'. This is applicable on accounting periods beginning on or after January 01, 2016. Amendments made to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in associates and joint ventures clarify that the exception from preparing consolidated financial statements is also available to intermediate parent entities which are subsidiaries of investment entities. An investment entity should consolidate a subsidiary which is not an investment entity and whose main purpose and activity is to provide services in support of the investment entity's investment activities. Entities which are not investment entities but have an interest in an associate or joint venture which is an investment entity have a policy choice when applying the equity method of accounting. The fair value measurement applied by the investment entity associate or joint venture can either be retained, or a consolidation may be performed at the level of the associate or joint venture, which would then unwind the fair value measurement. The application of these standards has no material impact on the Company's condensed interim financial information.

#### 23. Financial risk management

#### 23.1 Financial risk factors

The Company's activities may expose it to a variety of financial risks: market risk (including currency risk, other price risk and interest rate risk), credit risk and liquidity risk.

The condensed interim financial statements do not include all financial risk management information and disclosures required in the annual financial statements; they should be read in conjunction with the Company's annual financial statements as at June 30, 2016.

There have been no changes in the risk management department or in any risk management policies since the year end.

#### 23.2 Liquidity risk

Compared to year end, the Company settled long term borrowings of Rs 300.789 million including mark up of Rs. 203.192 Million and short term borrowings of Rs 105.45 Million inclusive of accrued markup against properties situated at Pace Towers and there was no material change in the contractual undiscounted cash out flows for remaining financial liabilities.

#### 23.3 Fair value estimation

Fair value is the amount for which an asset could be exchanged, or liability settled, between knowledgeable willing parties in an arm's length transaction. Underlying the definition of fair value is the presumption that the Company is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms. The carrying values of all financial assets and liabilities reflected in these financial statements approximate their fair values. Fair value is determined on the basis of objective evidence at each reporting date.

The tables below analyze assets carried at fair value as at March 31, 2017 and June 30, 2016.

The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The following is categorization of assets measured at fair value at March 31, 2017:

There were no transfers between Levels 1 and 2 & Levels 2 and 3 during the period and there were no changes in valuation techniques during the periods.

#### Valuation techniques used to measure level 2 and 3 assets

The fair value of these assets is determined by an independent professionally qualified valuer. Latest valuation of these assets was carried out on June 30, 2016. The level 2 fair value of freehold land has been derived using the sales comparison approach. The most significant input into this valuation approach is price per square yard. Level 3 fair value of Buildings has been determined using a depreciated replacement cost approach, whereby, current cost of construction of a similar building in a similar location has been adjusted using a suitable depreciation rate to arrive at present market value.

#### Fair value measurements using significant unobservable inputs (level 3)

The following table presents the changes in level 3 items for the period and year ended March 31, 2017 and June 30, 2016 for recurring fair value measurements:

The change in unrealized gains/ losses of the investment property is credited/charged to the profit and loss account as "Changes in fair value of investment property".

#### Valuation inputs and relationship to fair value

The following table summarises the quantitative and quantitative information about the significant unobservable inputs used in recurring level 3 fair value measurements. See paragraph above for the valuation techniques adopted.

#### Pace Pakistan Limited For the Nine months ended March 31, 2017

The Directors of Pace (Pakistan) Limited ("the Group") take pleasure in presenting to its shareholders the reviewed consolidated condensed interim financial statements of the Group (unaudited) for the quarter and Nine months ended March 31, 2017.

#### General Economic Overview:

The economy is on sustainable growth path with most of the indicators showing the positive trend. The GDP is expected to grow at the rate of 5.2% for the fiscal year 2016-17, compared to 4.7% of last year. The improved outlook is derived from the cumulative impact of government's economic and structural reform programs, sustained lower oil prices and the gradually improving law and order situation. The foreign exchange reserves stood at highest level of USD 23.3 billion. The strong reserve position averted a significant depreciation in the Rupee, which remained relatively firm despite weakening of regional currencies. Inflation remained under control at 3.9% due to stagnant oil prices and steady exchange rate. Acknowledging the improving macros, the SBP has maintained a status quo on the policy rate since May-16 and maintained it at 40 years' low level. The improved economic indicators together with PSX's divestment to a Chinese consortium, kept the momentum going in the capital markets. Resultantly, the PSX 100 index reached an all-time high of 47,807 points.

#### Real Estate and construction sector overview:

The real estate sector in Pakistan is growing and is an important sector of the economy. Pakistan spends about \$5.2 billion on construction annually, and construction output accounts for 2pc of GDP.

In FY16, loans to the construction industry more than doubled from Rs. 14 billion to Rs. 31.5 billion with a fresh lending of Rs. 17.5 billion. Add to it the Rs. 16 billion lent to the real estate sector (trading, renting and business) and the total amount (given to the two sectors) soars to Rs. 33.5 billion. The channelization of increasing funds towards real estate and construction sector hints an encouraging future for this sector. Moreover, the accelerating rate of urbanization in the country is contributing well towards growing demand of housing, thereby providing a strong support to the future prospects of real estate and construction sectors in Pakistan.

During the period, the sales revenue increased significantly by 48% to Rs.343.014 million, as against Rs.231.959 million during the same period last year. The primary reason for such increase is the sale of whole second floor of Pace Tower during the period, contributing around Rs.93.2 million towards sale revenue. Cost of Sale increased by 30% as compared with last year. The increase in cost of sale was due to corresponding increase in sale.

#### Settlement of financial obligations during the period:

During the period under review, the Group entered into a Debt/ Asset Swap Agreement ('DSA') with Pak Oman Investment Corporation ('POIC') for the settlement of the part of principal outstanding along-with markup accrued thereon aggregating to Rs.503.981 million against the property of the Group situated at lower ground floor and upper ground floor of Pace Towers measuring 11,487 square feet and 5,850 square feet respectively. In accordance with the DSA, POIC purchased the property of the Group for a consideration of Rs.300.789 million and waived accrued markup of Rs.203.192 million.

Moreover, during the period, the Group also entered into a Debt/ Asset Swap Agreement ('DSAA') with PAIR Investment Company Limited (formerly Pak-Iran Joint Investment Company Limited) ('PICL') for the settlement of Rs96.443 million provided by PICL and mark up of Rs.9.006 million against property of the Group situated at

Mezzanine floor of Pace Towers measuring 5,700 square feet. Additionally, PICL vacated its charge previously created in Pace's MM Alam Plaza to the extent of Rs.120.85 million.

#### Group's ability to continue as a Going Concern:

The Company has not been able to meet various obligations towards its lenders, including repayment of principal and markup thereon in respect of its borrowings. The Company has also been unable to realize its existing receivables from customers and is facing difficulties in sale of its inventory, being encumbered against its borrowings. These conditions may affect the Company's ability to continue as a going concern. In order to improve its profitability and cash-flow position, Board of Directors of the Company has approved in-principle, various new Joint Ventures. The BOD has also authorized CEO to identify and negotiate more and finalized Joint Venture projects across Pakistan especially in major cities. These joint ventures would help the Company to strengthen its brand, and to reap the lucrative profits being offered by continuously growing construction and real estate sector of Pakistan.

#### **Future Outlook:**

Through the delivery of key development projects during FY 2017 in form of Pace Towers and significant investment and share in pace Circle, we look forward to on boarding significant operating cash flows by successfully converting non-income-producing assets to cash flowing operating assets.

While we will continue to focus on improving our capital structure over the coming years, we will also look to make diligent and sound investment decisions when compelling opportunities arise.

With best-in-class assets and properties in prime irreplaceable dense cluster locations and a great team, we hope that our investors continue to focus on our fundamentals as a high-quality, innovative Group in real estate sector of Pakistan with a unique built-in platform for growth.

We thank our employees, for their hard work and strong commitment to our Group.

We are grateful for the confidence our investors have placed in us in this time of need and we ensure to continue our efforts and struggle to turnaround the situation and to produce improving results for shareholders in the near future.

The object of the company is to acquire by purchase or otherwise land and plots and to sell or construct, lease, hire and manage buildings, shopping malls, super markets, utility stores, plazas, shopping arcades etc.

### 1.2 Activities of the Group

The object of the Group is to build, acquire, manage and sell condominiums, departmental stores, shopping plazas, super markets, utility stores, housing societies and to carry out commercial, industrial and other related activities in and out of Pakistan.

## 1.3 Going concern assumption

As at the reporting date, the current liabilities of the Group have exceeded its current assets by Rs 1945.516 million and the reserves of the Group have been significantly depleted. The Group has not been able to meet various obligations towards its lenders, including repayment of principal and markup thereon in respect of its borrowings. As a consequence, the Group has also been unable to realize its existing receivables from customers and is facing difficulties in sale of its inventory, being encumbered against its borrowings. These conditions raise significant doubts on the Group's ability to continue as a going concern.

The management of the Group however, is continuously engaged with its lenders for settlements of its borrowings. During the current period PAIR Investment Company Limited (formerly Pak-Iran Joint Investment Company Limited) and Pak Oman Investment Corporation have settled their outstanding amounts against property situated at Pace Towers as mentioned in note 6.1.

The Group has also approached other lenders referred to in note 6 and 7 of these financial statements for restructuring/settlements of loans. As per the proposals the Group expects the following:

- Relaxation in payment terms of principal outstanding and over due markup;
- Settlement of principal amounts against properties of the Group; and
- Waiver of overdue markup;

The management of the Group is confident that the above actions and steps shall enable the Group to realize its existing receivables, aid the sale of inventory from the completed projects referred above and utilize the resultant liquidity for completion and sale of its 'Pace Towers' Project.

The condensed interim financial information has been prepared on a going concern basis based on the management's expectations that:

- the Group will be able to obtain relaxations from its lenders as highlighted above;
- the Group will be able to settle loans against its properties; and
- the Group will be able to readily realize its receivables and inventory and be able to utilize the resultant liquidity for completion and sale of the 'Pace Towers' Project.

The condensed interim financial information consequently, does not include any adjustment relating to the realization of its assets and liquidation of liabilities that might be necessary should the Group be unable to continue as a going concern.

#### 2. Statement of compliance

The condensed interim financial information is unaudited and has been prepared in accordance with the requirements of the International Accounting Standard (IAS) 34 - 'Interim Financial Reporting' and provisions of and directives issued under the Companies Ordinance, 1984. In case where requirements differ, the provisions of or directives issued under the Companies Ordinance, 1984 have been followed. This condensed interim financial information does not include all the information required for annual financial statements and therefore should be read in conjunction with the annual financial statements for the year ended June 30, 2016.

#### 3. Significant accounting policies

The accounting policies adopted for the preparation of this condensed interim financial information are the same as those applied in the preparation of preceding annual published financial statements of the Group for the year ended June 30, 2016.

#### Initial application of standards, amendments or an interpretation to existing standards 3.1

Following amendment to existing standard and interpretation has been published and is mandatory for accounting periods beginning on or after January 1, 2016 and is considered to be relevant to the Group's operations:

#### Standards, amendments to published standards and interpretations that are effective in the 3.1.1 current year and are applicable to the Group

- IFRS 10 'Consolidated financial statements' is applicable on accounting periods beginning on or after January 01, 2015. This standard builds on existing principles by identifying the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements. The standard provides additional guidance to assist in determining control where this is difficult to assess. The application of this standard has no material impact on the Group's financial statements.
- IFRS 11 'Joint arrangements' is applicable on accounting periods beginning on or after January 01, 2015. IFRS 11 is a more realistic reflection of joint arrangements by focusing on the rights and obligations of the parties to the arrangement rather than its legal form. There are two types of joint arrangement: joint operations and joint ventures. Joint operations arise where a joint operator has rights to the assets and obligations relating to the arrangement and therefore accounts for its share of assets, liabilities, revenue and expenses. Joint ventures arise where the joint operator has rights to the net assets of the arrangement and therefore equity accounts for its interest. Proportional consolidation of joint ventures is no longer allowed. The application of this standard has no material impact on the Group's financial statements.
- IFRS 12 'Disclosures of interests in other entities'. This is applicable on accounting periods beginning on or after January 01, 2015. This standard includes the disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and other off balance sheet vehicles. The application of this standard has no material impact on the Group's financial statements.
- IFRS 13, 'Fair value measurement'. This is applicable on accounting periods beginning on or after January 01, 2015. This standard aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRS. The requirements, which are largely aligned between IFRS and US GAAP, do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within IFRS or US GAAP. The application of this standard has no material impact on the Group's financial statements except for certain additional fair value disclosures .

## 4. Taxation

The provision for taxation for the nine months ended March 31, 2017 has been made on an estimated basis.

#### 5. Estimates

The preparation of condensed interim financial information requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial statements for the year ended June 30, 2016, with the exception of changes in estimates that are required in determining the provision for income taxes as referred to in Note 4.

## 24 Financial risk management

#### 24.1 Financial risk factors

The Group's activities may expose it to a variety of financial risks: market risk (including currency risk, other price risk and interest rate risk), credit risk and liquidity risk.

The condensed interim financial statements do not include all financial risk management information and disclosures required in the annual financial statements; they should be read in conjunction with the Group's annual financial statements as at June 30, 2016.

There have been no changes in the risk management department or in any risk management policies since the year end.

### 24.2 Liquidity risk

Compared to year end, the Group settled long term borrowings of Rs 300.789 million including mark up of Rs. 203.192 Million and short term borrowings of Rs 105.45 Million inclusive of accrued markup against properties situated at Pace Towers and there was no material change in the contractual undiscounted cash out flows for remaining financial liabilities.

#### 24.3 Fair value estimation

Fair value is the amount for which an asset could be exchanged, or liability settled, between knowledgeable willing parties in an arm's length transaction. Underlying the definition of fair value is the presumption that the Group is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms. The carrying values of all financial assets and liabilities reflected in these financial statements approximate their fair values. Fair value is determined on the basis of objective evidence at each reporting date.

The tables below analyze assets carried at fair value as at March 31, 2017 and June 30, 2016.

The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The following is categorization of assets measured at fair value at March 31, 2017:

There were no transfers between Levels 1 and 2 & Levels 2 and 3 during the period and there were no changes in valuation techniques during the periods.

## Valuation techniques used to measure level 2 and 3 assets

The fair value of these assets is determined by an independent professionally qualified valuer. Latest valuation of these assets was carried out on June 30, 2016. The level 2 fair value of freehold land has been derived using the sales comparison approach. The most significant input into this valuation approach is price per square yard. Level 3 fair value of Buildings has been determined using a depreciated replacement cost approach, whereby, current cost of construction of a similar building in a similar location has been adjusted using a suitable depreciation rate to arrive at present market value.

### Fair value measurements using significant unobservable inputs (level 3)

The following table presents the changes in level 3 items for the period and year ended March 31, 2017 and June 30, 2016 for recurring fair value measurements:

|  | Un-audited<br>March 31,<br>2017<br>(Rupees in | Audited<br>June 30,<br>2016<br>thousand) |

| Transferred to inventory                                 | 2,129,702                                     | 2,174,372                                |
| Add: Fair value loss recognised during the period / year | -   | (19,170)                                 |
| Closing value after revaluation                          | 2,129,702                                     | 2,155,202                                |

The change in unrealized gains/ losses of the investment property is credited/charged to the profit and loss account as "Changes in fair value of investment property".

### Valuation inputs and relationship to fair value

The following table summarises the quantitative and qualitative information about the significant unobservable inputs used in recurring level 3 fair value measurements. See paragraph above for the valuation techniques adopted.

| Description | Fair Va                     | alue at                    | Significant<br>Unobserv-able<br>inputs  | Quantitative Data / Range and<br>relationship to the fair value   |
|-------------|-----------------------------|----------------------------|---|---|
|             | March 31,<br>2017<br>Rs'000 | June 30,<br>2016<br>Rs'000 |   |   |
| Buildings   | 2,129,702                   | 2,155,202                  | Cost of construction of a new similar building  Suitable depreciation rate to arrive at depreciated replacement value | The market value has been determined by using a depreciation factor of approximately 5%-10% on cost of constructing a similar new building. Higher, the estimated cost of construction of a new building, higher the fair value. Further, higher the depreciation rate, the lower the fair value of the building. |

#### 25. Date of authorisation for issue

This condensed interim financial information was authorised for issue on April <u>28th</u>, 2017 by the Board of Directors of the Group.

## 26. Corresponding figures

In order to comply with the requirements of International Accounting Standard 34 - 'Interim Financial Reporting', the condensed interim balance sheet and condensed interim statement of changes in equity have been compared with the balances of annual audited financial statements of preceding financial year, whereas, the condensed interim profit and loss account, condensed interim statement of comprehensive income and condensed interim cash flow statement have been compared with the balances of comparable period of immediately preceding financial year. Corresponding figures have been re-arranged, wherever necessary, for the purpose of comparison. However, no significant rearrangements have been made.
